- Unit 5 – Concepts in Sales & Distribution
- Unit 6 – Future of SAP ERP Specific to Sales and Distribution

SPOKEN ENGLISH COURSE FOR SCHOOLS

Why Spoken English?

In today's global world, English has emerged as a link language. A good command over English is a must for anyone who wants to communicate effectively and succeed in the global village.

A command over spoken English involves more than just a good vocabulary; it involves correct diction stressing on the right parts and pausing at the right places. These are skills that are acquired through practice, observation and training. The best way to acquire these is through a programme that exclusively emphasises on spoken English.

The Expert Edge

The best way to learn flawless English is from the experts themselves. This course combines authentic BBC (British Broadcasting Corporation) news stories with specially developed learning activities to help young learners become proficient in English and communicate fluently, effectively and confidently.

The BBC Edge

The traditional method of teaching English in India emphasises on only grammar, rote learning and translations, etc.; it does not foster effective speaking skills. What students need is a specially designed course coupled with effective methodology that not only teaches them to speak correctly but also improves their diction and accent.

The Trainer Edge

The Spoken English Course for schools covers all the vital components that help students speak better English. The course designed by BBC /EE, who are experts in the nuances of the language and provide individual attention, focusing on the exclusive needs of the learners to help them speak confidently. The course teaches practical spoken English unlike other courses that focus on only language rules and facts.

The course is a unique blend of 40 classroom sessions and self-learning sessions. The self-learning is app-based and allows students to practice at their own pace. The use of BBC scenarios helps students speak English fluently.
