

Anekant Education Society's

**Tuljaram Chaturchand College,
Baramati**

(Autonomous)

**Three Year B.Voc Degree Program in
Food Technology & Research**

(Faculty of Food Technology & Research)

FY B.Voc (Food Technology) Semester –I

For Department Food Technology & Research

**Tuljaram Chaturchand College,
Baramati**

To be implemented from Academic Year 2022-2023

Title of the Programme: FY B.Voc. (Food Technology & Research)

**Anekant Education Society's
TULJARAM CHATURCHAND COLLEGE, BARAMATI
DIST-Pune-413102
Autonomous**

First Year: Semester-I

Subj. Code	Subject Name	No. of Credits	Marks
Theory (General Component)			
UBFP111	Principles of Food Preservation	4	100
UBFP112	Food Microbiology - I	4	100
UBFP113	Food Science - I	4	100
Practical (Skill Component)			
UBFP1111	Principles of Food Preservation	6	150
UBFP1112	Computer Application	6	150
UBFP1113	Food Science-I	6	150

First Year: Semester-II

Subj. Code	Subject Name	No. of Credits	Marks
Theory (General Component)			
UBFP121	Nutrition Science	4	100
UBFP122	Food Microbiology-II	4	100
UBFP123	Food Science - II	4	100
Practical (Skill Component)			
UBFP1211	Nutrition Science	6	150
UBFP1212	Food Microbiology-II	6	150
UBFP1213	Soft Skill Development	6	150

Second Year: Semester-III

Subj. Code	Subject Name	No. of Credits	Marks
Theory (General Component)			
FP-7	Processing of Fruits, Vegetables & Plantation Crops	4	100
FP-8	Food Analytical Techniques	4	100
FP-9	Food Chemistry-I	4	100
Practical (Skill Component)			
FP-3.1	Processing of Fruits, Vegetables & Plantation crops	6	150
FP-3.2	Food Analytical Techniques	6	150
FP-3.3	Fundamentals in Bio-Statistics	6	150

Second Year: Semester-IV

Subj. Code	Subject Name	No. of Credits	Marks
Theory (General Component)			
FP-10	Processing of Cereal, Pulses and Oilseeds	4	100
FP-11	Bakery and Confectionery Technology	4	100
FP-12	Food Chemistry-II	4	100

Practical (Skill Component)			
FP-4.1	Processing of Cereal, Pulses and Oilseeds	6	150
FP-4.2	Bakery and Confectionary Technology	6	150
FP-4.3	Food Chemistry -II	6	150

Third Year: Semester-V

Subj. Code	Subject Name	No. of Credits	Marks
Theory (General Component)			
FP-13	Dairy Technology	4	100
FP-14	Food Quality and Safety Management	4	100
FP-15	Principle of Post-Harvest Technology	4	100
Practical (Skill Component)			
FP-5.1	Dairy Technology	6	150
FP-5.2	Entrepreneurship Development	6	150
FP-5.3	Project	6	150

Third Year: Semester-VI

Subj. Code	Subject Name	No. of Credits	Marks
Theory (General Component)			
FP-16	Animal Product Technology	4	100
FP-17	Food Safety, Hygiene & Sanitation	4	100
FP-18	Packaging Technology	4	100
Practical (Skill Component)			
FP-6.1	Animal Product Technology	6	150
FP-6.2	Packaging Technology	6	150
FP-6.3	Internship	6	150

Title of the Course: B. Voc. (Food Processing & Post Harvest Technology)
(To be implemented from Academic Year - 2022-2023)

Course structure:

- B. Voc. is three year degree programme with three theory and three practical courses in each semester.
- Each theory course will be of four credits and each credit is of 15 periods
- Each practical course will be of six credits and each credit is of 15 periods
- Each period is of one clock hour.
- In each practical course, there will be one visit to the relevant industry/ institute.
- In addition to the regular practicals based on the theory course, special emphasis will be on communications and soft skills development of the students.

Eligibility:

- 1) **First Year B.Voc. (Diploma):** A student who has passed the Higher Secondary School Certificate (10+2) in any stream or its equivalent examination
- 2) **Second Year B.Voc. (Advanced diploma):** Keeping terms of First Year of B. Voc. and if they fulfill the eligibility conditions.
- 3) **Third Year B.Voc. (Degree):** Student shall pass all First Year B. Voc. courses and satisfactorily keeping terms of Second Year of B. Voc.

Note: Admissions will be given as per the selection procedure / policies adopted by the college, in accordance with conditions laid down by the Savitribai Phule Pune University, Pune.

Examination Pattern:

Examination:

➤ **Pattern of Examination.**

- i) Internal exam, Term end exam, Oral, Project, Presentation, GD, Viva voce
- ii) Pattern of the question paper:

- i) 25% Objective Question
- ii) 50% Short and Long Answer type question
- iii) 25% Problem based Case Study/long answer type

➤ **Theory Examination: -**

- i) Continuous Internal Assessment: 50 Marks (Unit Test I & II, Assignment-2No., Attendance) for each course of programme.
- ii) Semester End Examination: 50 Marks on the basis of Answer Sheet Evaluation for each course

➤ **Practical Examination: -**

- i) Continuous Internal Assessment: 75 Marks (Written exams, Visit Report, Journal, Viva Voce, Seminar/Presentation, Group Discussion and Attendance) for each course.
- ii) Semester End Examination: 75 Marks on the basis of Answer Sheet Evaluation with performance in practical examination which will be evaluated by external examiner for each course.

Programme Specific Outcomes (PSOs)

PO-1	Disciplinary Knowledge	Understand the basic concepts, fundamental principles and experimental findings and the scientific theories related to food technology, food science and food technology & engineering and its other fields related to the program.
PO-2	Communication Skills	Develop various communication skills such as reading, listening and speaking skills to express ideas and views clearly and effectively.
PO-3	Critical Thinking	Propose novel ideas in explaining the scientific data, facts and figures related to science and technology.
PO-4	Analytical Reasoning and Problem Solving	To enable the students with good scientific and engineering knowledge so as to comprehend, design, and create food products and devices for the food industry and provide solutions for the challenges in the food industry as well as in agriculture.
PO-5	Sense of Inquiry	Curiously ask relevant questions for better understanding of fundamental concepts and principles, scientific theories and applications related to the study.
PO-6	Use of Modern Tools	Operate modern tools, equipment, instruments and laboratory techniques to perform the experiments and write the programs in different languages.
PO-7	Research Skills	Understand how to design, collect, analyze, interpret and evaluate information/data that is relevant to food technology.
PO-8	Application of Knowledge	Develop a scientific outlook and apply the knowledge with respect to food technology.
PO-9	Ethical Awareness	To train students in professional and ethical attitude, effective communication skills, teamwork skills and multidisciplinary approaches related to food technology and engineering.
PO-10	Teamwork	Understand the basic concepts, fundamental principles and experimental findings and the scientific theories related to food technology, food science and food technology & engineering and its other fields related to the program.
PO-11	Environment and Sustainability	Develop various communication skills such as reading, listening and speaking skills to express ideas and views clearly and effectively.
PO-12	Lifelong Learning	Propose novel ideas in explaining the scientific data, facts and figures related to science and technology.

First Year

Semester I

Theory Paper No, UBFP-111, Principles of Food Preservation

Maximum Marks: 100

Credits: 4

Teaching Period: 4 /week

Teaching Load: 60 Theory Period/Semester

Learning Objectives:

- To study importance of shelf life and preservation of foods
- To study traditional methods of food preservation
- To study different modern methods of food preservation
- To develop the skills for processing of food after postharvest
- To learn various types of food preservatives
- To study current scenario of food preservation

Course Outcomes:

CO1: Students will have a thorough understanding of various food processing techniques.

CO2: The students will know the importance of various preservation techniques.

CO3: The students will know about traditional methods of food preservation

CO3: Students will have thorough knowledge of emerging preservation techniques

CO4: Students will get practical skills for processing of food after postharvest

CO5: Students will have a thorough understanding of types of food preservatives

CO6: Students will get thorough knowledge of current scenario of food preservation

CO7: Students will know importance of various packaging and processing methods in food preservation

TOPICS-

Unit-1: Introduction to Preservation

10 Periods

Definition, Introduction to preservation, History of preservation, general principles of food preservation, Need & benefits of industrial food preservation & Methods of Preservation

Unit-2: Preservation by drying

15 Periods

Types of drying, changes during drying, effect of drying on food, advantages and disadvantages of drying

Unit-3: Preservation by High & Low temperature

15 Periods

Preservation by high temperature: Blanching, pasteurization & Canning, Effect of heat on food and micro-organisms

Preservation by low temperature: Chilling, Refrigeration & freezing Effect of low temperature on food & microorganisms

Unit-4: Preservation by Irradiation & Non Thermal Methods

10 Periods

Introduction & units of irradiation, mechanism of action of radiation, radiation process, effect of radiation on food, effect of radiation on micro-organisms, Non-thermal methods

Unit-5: Preservation by other methods**10 Periods**

Definition of preservative, Types of preservatives- Class I & Class II, Carbonation, Antibiotics, Fermentation & Filtration

CO7	-	-	1	-	-	-	-	-	1	-	-	-

Justification for the mapping

PO1:- Disciplinary Knowledge - Understand the basic concepts, fundamental principles and experimental findings and the scientific theories related to food technology, food science and Food technology & engineering and its other fields related to the program.

CO1: Students will have a thorough understanding of various food processing techniques, by using various equipment's and also by using traditional methods.

CO2: The students will know the importance of various preservation techniques like preservation by salt, sugar oil and other various preservation techniques.

CO4: Students will get practical skills for processing of food after postharvest like preparation of various food products.

CO5: Students will have a thorough understanding of types of food preservatives like natural preservatives, chemical preservatives and their uses, advantages disadvantages etc.

CO6: Students will get thorough knowledge of current scenario of food preservation.

PO2:- Communication Skills:- Develop various communication skills such as reading, listening and speaking skills to express ideas and views clearly and effectively.

CO2: The students will know the importance of various preservation techniques like preservation by salt, sugar oil and other various preservation techniques.

CO3: The students will know about traditional methods of food preservation and they can express their new ideas for preservation.

CO6: Students will get thorough knowledge of current scenario of food preservation, and they can communicate with the indurates.

PO3- Critical Thinking :- Propose novel ideas in explaining the scientific data, facts and figures related to Science and technology.

CO2:The students will know the importance of various preservation techniques like preservation by salt, sugar oil and other various preservation techniques.

CO4: Students will get practical skills for processing of food after postharvest like preparation of various food products and get knowledge about machines.

CO7: Students will know importance of various packaging and processing methods in food preservation so they can think about more packaging materials and processing.

PO4- Analytical Reasoning and Problem Solving- To enable the students with good scientific and engineering knowledge so as to comprehend, design, and create food products and devices for the food industry and provide solutions for the challenges in the food industry as well as in agriculture.

CO2:The students will know the importance of various preservation techniques like preservation by salt, sugar oil and other various preservation techniques.

PO5- Sense of Inquiry:- Curiously ask relevant questions for better understanding of fundamental concepts and principles, scientific theories and applications related to the study.

CO1: Students will have a thorough understanding of various food processing techniques, by using various equipment's and also by using traditional methods.

CO3: Students will have thorough knowledge of emerging preservation techniques

CO5: Students will have a thorough understanding of types of food preservatives like natural preservatives, chemical preservatives and their uses, advantages disadvantages etc.

CO6: Students will get thorough knowledge of current scenario of food preservation.

PO6- Use of Modern Tools:-

Operate modern tools, equipment, instruments and laboratory techniques to perform the experiments and write the programs in different languages.

CO2:The students will know the importance of various preservation techniques like preservation by salt, sugar oil and other various preservation techniques.

PO7- Research Skills:- Understand how to design, collect, analyze, interpret and evaluate information/data that is relevant to food technology.

CO4: Students will get practical skills for processing of food after postharvest like preparation of various food products.

PO8- Application of Knowledge:- Develop a scientific outlook and apply the knowledge with respect to food technology.

CO3: Students will have thorough knowledge of emerging preservation techniques so they can get knowledge about different scientific preservation techniques.

CO5: Students will have a thorough understanding of types of food preservatives like natural preservatives, chemical preservatives and their uses, advantages disadvantages etc.

PO9- Ethical Awareness- To train students in professional and ethical attitude, effective communication skills, team work skills and multidisciplinary approaches related to food technology and engineering.

CO1: Students will have a thorough understanding of various food processing techniques, by using various equipment's and also by using traditional methods.

CO5: Students will have a thorough understanding of types of food preservatives like natural preservatives, chemical preservatives and their uses, advantages disadvantages etc.

CO6: Students will get thorough knowledge of current scenario of food preservation.

CO7: Students will know importance of various packaging and processing methods in food preservation so they can think about more packaging materials and processing.

PO10:- Team Work - Understand the basic concepts, fundamental principles and experimental findings and the scientific theories related to food technology, food science and Food technology & engineering and its other fields related to the program.

CO1: Students will have a thorough understanding of various food processing techniques, by using various equipment's and also by using traditional methods.

CO2: The students will know the importance of various preservation techniques like preservation by salt, sugar oil and other various preservation techniques.

CO4: Students will get practical skills for processing of food after postharvest like preparation of various food products.

CO5: Students will have a thorough understanding of types of food preservatives like natural preservatives, chemical preservatives and their uses, advantages disadvantages etc.

CO6: Students will get thorough knowledge of current scenario of food preservation.

PO11:- Environment and Sustainability:- Develop various communication skills such as reading, listening and speaking skills to express ideas and views clearly and effectively.

CO2: The students will know the importance of various preservation techniques like preservation by salt, sugar oil and other various preservation techniques.

CO3: The students will know about traditional methods of food preservation and they can express their new ideas for preservation.

Po12:- Lifelong Learning:- Propose novel ideas in explaining the scientific data, facts and figures related to Science and technology.

CO2:The students will know the importance of various preservation techniques like preservation by salt, sugar oil and other various preservation techniques.

CO4: Students will get practical skills for processing of food after postharvest like preparation of various food products and get knowledge about machines.

CO7: Students will know importance of various packaging and processing methods in food preservation so they can think about more packaging materials and processing.

First Year

Semester I

Theory Paper No, UBFP-112, Food Microbiology –I

Maximum Marks: 100

Credits: 4

Teaching Period: 4 /week

Teaching Load: 60 Theory Period/Semester

Learning Objectives:

- To learn importance and role of microorganism in food technology
- Learn about the morphology of different microorganisms
- To study harmful and beneficial microorganisms
- To study emerging technologies related to microbes
- Study the spoilage caused by microorganism
- Learn about important microorganisms used in food processing industry

Course Outcome:

CO1:Students will know role of microbes in food technology

CO2:Students will have a thorough understanding of microbes responsible for food spoilage.

CO3:The students will know the specifications of various contamination sources and disease developed in certain processed products.

CO4:Students will get thorough knowledge of harmful and beneficial microbes

CO5:Students will get knowledge about emerging technologies related to microbes

CO6:Students will know production of various substances by using microbes

CO7:Students will know importance of microorganisms in food technology

TOPICS:-

Unit-1 History & scope of Microbiology

12 Periods

Introduction to microbiology, Historical Contribution of various scientists, scope of microbiology in food, Types of cell – Prokaryotic & Eukaryotic cell, Introduction to various types of micro-organisms

Unit-2Morphology & cytology of bacteria

13 Periods

Classification of Bacteria on the basis of Structure/Shape/Size& functions of various parts of bacterial cell

Unit-3Microbial growth in food

10 Periods

Factors affecting growth of micro-organisms, Growth curve, Thermal Death Time, D, F, 12D and Z values

Unit-4 Food spoilage

10 Periods

Sources of contamination, causes of spoilage, Classification of food depending on ease of spoilage, Details of Spoilage of different food products such as Dairy, Animal Products fruits and Vegetables.

Unit-5: Food in relation to disease

10 Periods

Food borne illness: Bacteria causing food borne diseases, food borne poisoning, infections and intoxications: nonbacterial- mycotoxin, Rickettsia, sea food toxicants, Characteristics of organism & Toxin, Food sources, Symptoms and prophylaxis.

Justification for the mapping

PO1:- Disciplinary Knowledge - Understand the basic concepts, fundamental principles and experimental findings and the scientific theories related to food technology, food science and Food technology & engineering and its other fields related to the program.

CO1:Students will know role of microbes in food technology by getting information with practical.

CO2:Students will have a thorough understanding of microbes responsible for food spoilage like spoilage in milk and various food products.

CO3:The students will know the specifications of various contamination sources and disease developed in certain processed products like food poisoning.

CO5:Students will get knowledge about emerging technologies related to microbes through the thermal information.

CO6:Students will know production of various substances by using microbes

PO2:- Communication Skills:- Develop various communication skills such as reading, listening and speaking skills to express ideas and views clearly and effectively.

CO2:Students will have a thorough understanding of microbes responsible for food spoilage like spoilage in milk and various food products.

CO5:Students will get knowledge about emerging technologies related to microbes through the thermotical information.

CO6:Students will know production of various substances by using microbes

CO7:Students will know importance of microorganisms in food technology with different equipment and microorganisms.

PO3- Critical Thinking :- Propose novel ideas in explaining the scientific data, facts and figures related to Science and technology.

CO2:Students will have a thorough understanding of microbes responsible for food spoilage like spoilage in milk and various food products

CO5:Students will get knowledge about emerging technologies related to microbes through the thermotical information.

CO6:Students will know production of various substances by using microbes

CO7:Students will know importance of microorganisms in food technology with different equipment and microorganisms.

PO4- Analytical Reasoning and Problem Solving- To enable the students with good scientific and engineering knowledge so as to comprehend, design, and create food products and devices for the food industry and provide solutions for the challenges in the food industry as well as in agriculture.

CO3:To know the specifications of various contamination sources and disease developed in certain processed products.

CO4:Students will get thorough knowledge of harmful and beneficial microbes which used in food industries also get information about different equipment used to grow the microorganisms.

CO5:Students will get knowledge about emerging technologies related to microbes through the thermotical information.

CO6:Students will know production of various substances by using microbes and their uses in food industries.

PO5- Sense of Inquiry:- Curiously ask relevant questions for better understanding of fundamental concepts and principles, scientific theories and applications related to the study.

CO1: Students will know role of microbes in food technology by getting information with practical.

CO2: Students will have a thorough understanding of microbes responsible for food spoilage like spoilage in milk and various food products

CO3:To know the specifications of various contamination sources and disease developed in certain processed products.

PO6- Use of Modern Tools:-

Operate modern tools, equipment, instruments and laboratory techniques to perform the experiments and write the programs in different languages.

CO4:Students will get thorough knowledge of harmful and beneficial microbes which used in food industries also get information about different equipment used to grow the microorganisms.

CO5:Students will get knowledge about emerging technologies related to microbes through the thermal information.

PO7- Research Skills:- Understand how to design, collect, analyze, interpret and evaluate information/data that is relevant to food technology.

CO4:Students will get thorough knowledge of harmful and beneficial microbes which used in food industries also get information about different equipment used to grow the microorganisms.

CO6:Students will know production of various substances by using microbes and their uses in food industries.

PO8- Application of Knowledge:- Develop a scientific outlook and apply the knowledge with respect to food technology.

CO1:Students will know role of microbes in food technology by getting information with practical.

CO2:Students will have a thorough understanding of microbes responsible for food spoilage like spoilage in milk and various food products.

PO9- Ethical Awareness- To train students in professional and ethical attitude, effective communication skills, team work skills and multidisciplinary approaches related to food technology and engineering.

PO10:- Team Work - Understand the basic concepts, fundamental principles and experimental findings and the scientific theories related to food technology, food science and Food technology & engineering and its other fields related to the program.

CO1: Students will have a thorough understanding of various food processing techniques, by using various equipment's and also by using traditional methods.

CO2:The students will know the importance of various preservation techniques like preservation by salt, sugar oil and other various preservation techniques.

CO4: Students will get practical skills for processing of food after postharvest like preparation of various food products.

CO5: Students will have a thorough understanding of types of food preservatives like natural preservatives, chemical preservatives and their uses, advantages disadvantages etc.

CO6: Students will get thorough knowledge of current scenario of food preservation.

PO11:- Environment and Sustainability:- Develop various communication skills such as reading, listening and speaking skills to express ideas and views clearly and effectively.

CO1:Students will know role of microbes in food technology by getting information with practical.

CO2:Students will have a thorough understanding of microbes responsible for food spoilage like spoilage in milk and various food products.

CO3:The students will know the specifications of various contamination sources and disease developed in certain processed products like food poisoning.

CO5:Students will get knowledge about emerging technologies related to microbes through the thermotical information.

CO6:Students will know production of various substances by using microbes

PO12:- Lifelong Learning:- Propose novel ideas in explaining the scientific data, facts and figures related to Science and technology.

CO2:Students will have a thorough understanding of microbes responsible for food spoilage like spoilage in milk and various food products

CO5:Students will get knowledge about emerging technologies related to microbes through the thermotical information.

CO6:Students will know production of various substances by using microbes

CO7:Students will know importance of microorganisms in food technology with different equipment and microorganisms.

First Year

Semester I

Theory Paper No, UBFP-113, Food Science – I

Maximum Marks: 100
Teaching Period: 4 /week

Credits: 4
Teaching Load: 60 Theory Period/Semester

Learning Objectives:

- To study different cooking methods and principle of heat transfer
- To make students aware about various food groups and composition
- To make students understand the nutritive value and effect of cooking on foods
- To study various nutrients and their importance
- To study deficiency diseases caused due to nutrients
- To study importance of balanced diet

Course Outcomes:

CO1:The students will know about the basic cookery and the nutritive value of food products

CO2:The students will classify the products according to composition

CO3:The students will explain role of each food group products

CO4: The students will able to identify cause of deficiency diseases

CO5:The students will have thorough knowledge of importance of nutrients

CO6:The students will have thorough knowledge of effect of cooking on nutrients

CO7:The students will know importance of balanced diet for healthy life

TOPICS-

Unit-1: Introduction to Food science

12 Periods

Scope and Opportunities in Food Industries, Definition, Functions of food, Food groups, mode of heat transfer, Cooking- objectives, Preparation & cooking methods

Unit-2: Cereals& Pulses

15 Periods

Cereals: Structure, Composition& nutritive value of Wheat, Rice & Maize, Cereal Cookery, Role of cereals in cookery, other important Cereals, Textured Vegetable Protein (TVP) Sources and Advantage

Pulses -Composition & Nutritive value, toxic constituents & its elimination, Germination and its Changes, Pulse cookery, Role of pulses in cookery

Unit-3: Nuts & Oilseeds

10 Periods

Composition & Nutritive value, important nuts & oilseeds, toxins, Role of nuts & oilseeds in cookery

Unit-4: Fruits & Vegetables

15 Periods

Fruits- Classification, Sources, Composition and Nutritive value, ripening of fruits, Browning of fruits

Vegetables -Classification, Composition and Nutritive value, Vegetable cookery, Role of vegetable in cookery

Unit -5: Spices & Aromatics**8 Periods**

Classification, General functions of spices, Herbs, role of spices in cookery

CO1:The students will know about the basic cookery and the nutritive value of food products and get information about nutritious food.

CO5:The students will have thorough knowledge of importance of nutrients & food.

CO6:The students will have thorough knowledge of effect of cooking on nutrients and cooking effect on nutrients which are present in food.

CO7:The students will know importance of balanced diet for healthy life and healthy body.

PO10:- Team Work - Understand the basic concepts, fundamental principles and experimental findings and the scientific theories related to food technology, food science and Food technology & engineering and its other fields related to the program.

CO1:The students will know about the basic cookery and the nutritive value of food products and get information about nutritious food.

CO2:To classify the products according to composition

CO4: The students will be able to identify cause of deficiency diseases & get knowledge about food diseases.

CO5:The students will have thorough knowledge of importance of nutrients & food.

CO6:The students will have thorough knowledge of effect of cooking on nutrients and cooking effect on nutrients which are present in food.

PO11:- Environment and Sustainability:- Develop various communication skills such as reading, listening and speaking skills to express ideas and views clearly and effectively.

CO2:To classify the products according to composition

CO3:The students will explain role of each food group products and their importance in daily life.

CO5:The students will have thorough knowledge of importance of nutrients & food.

PO12:- Lifelong Learning:- Propose novel ideas in explaining the scientific data, facts and figures related to Science and technology.

CO4: The students will be able to identify cause of deficiency diseases & get knowledge about food diseases.

CO7:The students will know importance of balanced diet for healthy life and healthy body.

First Year

Semester I

Practical Paper No, UBFP-1111, Principles of Food Preservation

Maximum Marks: 150

Credits: 6

Teaching Period: 2/week

Teaching Load:24Practicals/Sem (4 Periods each)

Learning Objectives:

- To study importance of shelf life and preservation of foods
- To study traditional methods of food preservation
- To study different modern methods of food preservation
- To develop the practical skills for processing of food after postharvest
- To learn various types of food preservatives
- To study current scenario of food preservation techniques

Course Outcomes:

CO1: Students will have a thorough understanding of various food processing techniques.

CO2:The students will get practical knowledge of various preservation techniques.

CO3: The students will know about traditional methods of food preservation

CO3: Students will have thorough knowledge of emerging preservation techniques

CO4: Students will getpractical skills for processing of food after postharvest

CO5: Students will have a thorough understanding of types of food preservatives

CO6: Students will getthorough knowledge of current scenario of food preservation

CO7: Students will know importance of various packaging and processing methods in food preservation

TOPICS-

1.	Study of laboratory instruments	2P
2.	Study of blanching of different fruits & vegetables	2P
3.	Preservation by using sugar (Jam/Jelly/Marmalade)	2P
4.	Preservation by using salt (Vegetable Pickle)	1P
5.	Preservation by using oil & spices (Pickles)	1P
6.	Preservation by fermentation (Idli, Dhokla, Jalebi and Sauerkraut)	2P
7.	Preservation by vinegar	1P
8.	Preservation by using chemical preservatives	2P
9.	Preservation by high temperature (canning)	2P
10.	Preservation by low temperature (Peas Preservation)	1P
11.	Preservation by drying (Fruits and Vegetable)	3P
12.	Study of Osmotic dehydration (Fruit Candy)	3P
13.	Visit to Industry	1P
14.	Preparation of report on Industrial Visit	1P
15.	Activities (Market Survey)	2P

CO/ PO	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12
CO1	3	-	-	-	4	-	-	-	3	3	-	-
CO2	1	1	-	-	-	3	4	5	-	1	1	-
CO3	-	1	-	2	1	5	5	4	-	-	1	-
CO4	1	-	2	-	-	-	1	-	-	1	-	2
CO5	2	-	-	-	1	-	-	2	1	2	-	-
CO6	1	5	-	-	1	-	-	-	1	1	5	-
CO7	-	-	-	-	-	-	-	-	1	-	-	-

Justification for the mapping

PO1:- Disciplinary Knowledge - Understand the basic concepts, fundamental principles and experimental findings and the scientific theories related to food technology, food science and Food technology & engineering and its other fields related to the program.

CO1: Students will have a thorough understanding of various food processing techniques so they can implement that in any food industries.

CO2: The students will get practical knowledge of various preservation techniques and also different equipment.

CO3: The students will know about traditional methods of food preservation and they can use in daily life also.

CO4: Students will get practical skills for processing of food after postharvest.

CO5: Students will have a thorough understanding of types of food preservatives and use it in various food products to increase their shelf life.

CO6: Students will get thorough knowledge of current scenario of food preservation

PO2:- Communication Skills:- Develop various communication skills such as reading, listening and speaking skills to express ideas and views clearly and effectively.

CO2: The students will know the importance of various preservation techniques like preservation by salt, sugar oil and other various preservation techniques.

CO3: The students will know about traditional methods of food preservation and they can express their new ideas for preservation.

CO6: Students will get thorough knowledge of current scenario of food preservation, and they can communicate with the industries.

PO3- Critical Thinking :- Propose novel ideas in explaining the scientific data, facts and figures related to

Science and technology.

CO2: The students will know the importance of various preservation techniques like preservation by salt, sugar oil and other various preservation techniques.

CO4: Students will get practical skills for processing of food after postharvest like preparation of various food products and get knowledge about machines.

CO7: Students will know importance of various packaging and processing methods in food preservation so they can think about more packaging materials and processing.

PO4- Analytical Reasoning and Problem Solving- To enable the students with good scientific and engineering knowledge so as to comprehend, design, and create food products and devices for the food industry and provide solutions for the challenges in the food industry as well as in agriculture.

CO2:The students will know the importance of various preservation techniques like preservation by salt, sugar oil and other various preservation techniques.

PO5- Sense of Inquiry:- Curiously ask relevant questions for better understanding of fundamental concepts and principles, scientific theories and applications related to the study.

CO1: Students will have a thorough understanding of various food processing techniques, by using various equipment's and also by using traditional methods.

CO3: Students will have thorough knowledge of emerging preservation techniques

CO5: Students will have a thorough understanding of types of food preservatives like natural preservatives, chemical preservatives and their uses, advantages disadvantages etc.

CO6: Students will get thorough knowledge of current scenario of food preservation.

PO6- Use of Modern Tools:-

Operate modern tools, equipment, instruments and laboratory techniques to perform the experiments and write the programs in different languages.

CO2:The students will know the importance of various preservation techniques like preservation by salt, sugar oil and other various preservation techniques.

PO7- Research Skills:- Understand how to design, collect, analyze, interpret and evaluate information/data that is relevant to food technology.

CO4: Students will get practical skills for processing of food after postharvest like preparation of various food products.

PO8- Application of Knowledge:- Develop a scientific outlook and apply the knowledge with respect to food technology.

CO3: Students will have thorough knowledge of emerging preservation techniques so they can get knowledge about different scientific preservation techniques.

CO5: Students will have a thorough understanding of types of food preservatives like natural preservatives, chemical preservatives and their uses, advantages disadvantages etc.

PO9- Ethical Awareness- To train students in professional and ethical attitude, effective communication skills, team work skills and multidisciplinary approaches related to food technology and engineering.

CO1: Students will have a thorough understanding of various food processing techniques, by using various equipment's and also by using traditional methods.

CO5: Students will have a thorough understanding of types of food preservatives like natural preservatives, chemical preservatives and their uses, advantages disadvantages etc.

CO6: Students will get thorough knowledge of current scenario of food preservation.

CO7: Students will know importance of various packaging and processing methods in food preservation so they can think about more packaging materials and processing.

PO10:- Team Work - Understand the basic concepts, fundamental principles and experimental findings and the scientific theories related to food technology, food science and Food technology & engineering and its other fields related to the program.

CO1: Students will have a thorough understanding of various food processing techniques, by using various equipment's and also by using traditional methods.

CO2: The students will know the importance of various preservation techniques like preservation by salt, sugar oil and other various preservation techniques.

CO4: Students will get practical skills for processing of food after postharvest like preparation of various food products.

CO5: Students will have a thorough understanding of types of food preservatives like natural preservatives, chemical preservatives and their uses, advantages disadvantages etc.

CO6: Students will get thorough knowledge of current scenario of food preservation.

PO11:- Environment and Sustainability:- Develop various communication skills such as reading, listening and speaking skills to express ideas and views clearly and effectively.

CO2: The students will know the importance of various preservation techniques like preservation by salt, sugar oil and other various preservation techniques.

CO3: The students will know about traditional methods of food preservation and they can express their new ideas for preservation.

PO12:- Lifelong Learning:- Propose novel ideas in explaining the scientific data, facts and figures related to Science and technology.

CO1: Students will have a thorough understanding of various food processing techniques so they can implement that in any food industries.

CO2: The students will get practical knowledge of various preservation techniques and also different equipment.

CO3: The students will know about traditional methods of food preservation and they can use in daily life also.

CO4: Students will get practical skills for processing of food after postharvest.

CO5: Students will have a thorough understanding of types of food preservatives and use it in various food products to increase their shelf life.

CO6: Students will get thorough knowledge of current scenario of food preservation

First Year

Semester I

Practical Paper No, UBFP-1112, Food Science

Maximum Marks: 150

Credits: 6

Teaching Period: 2/week

Teaching Load: 24 Practical/Semester (4 Period each)

Learning Objectives:

- To study different cooking methods and principle of heat transfer
- To make students aware about various food groups and composition
- To make students understand the nutritive value and effect of cooking on foods
- To study various nutrients and their importance
- To study deficiency diseases caused due to nutrients
- To study importance of balanced diet

Course Outcomes:

CO1: The students will know about the basic cookery and the nutritive value of food products

CO2: The students will classify the products according to composition

CO3: The students will explain role of each food group products

CO4: The students will able to identify cause of deficiency diseases

CO5: The students will have thorough knowledge of importance of nutrients

CO6: The students will have thorough knowledge of effect of cooking on nutrients

CO7: The students will know importance of balanced diet for healthy life

TOPICS-

1. Study of different cooking methods	2P
2. Preparation of rice flakes	2P
3. Preparation of soya nuts	2P
4. Extraction of edible oil	2P
5. Preparation of Coated masala Groundnuts	1P
6. Study of Germination/Malting	1P
7. Preparation of Garlic/Ginger Paste	1P
8. Preparation of condensed milk	1P
9. Preparation of chips & wafers	2P
10. Preparation of Tuti fruity	2P
11. Preparation of instant soup mix	1P
12. Study of stages in preparation of sugar syrup	1P
13. Preparation of hard boiled candy	1P
14. Preparation of curry powder	1P
15. Preparation of turmeric powder	2P
16. Preparation of powdered drinks	1P
17. Visit to industry	1P
18. Preparation of report on industrial visit & presentation	2P

First Year

Semester I

Practical Paper No, UBFP-1113, Computer Application

Maximum Marks: 150

Credits: 6

Teaching Period: 2/week

Teaching Load:24Practical/Semester 4Periods each)

Learning Objectives:

- To know importance of computer
- To make students aware about different operating systems of computer
- To make students understand different applications of computer
- To study various uses of internet
- To study conversion of various files from one form to another
- To study importance of computer knowledge

Course Outcomes:

CO1: The students will know about the basics of computer

CO2: The students will understand different applications of computer

CO3: The students will understand different aspects of computer like Photoshop, Corel draw etc.

CO4: The students will able to do and operate E-mail, MS-word, Excel, Powerpoint

CO5: The students will have thorough knowledge of Photoshop, Corel draw

CO6: The students will have thorough knowledge of searching various documents, PDF, etc.

CO7: The students will know importance of computer skills

TOPICS -

1. Introducing Computer and Operating system	1P
2. MS-WORD	2P
3. MS-EXCEL	2P
4. MS-POWERPOINT	2P
5. Introduction to the internet, search engine	2P
6. E-Mails, Google Docs and Forms	3P
7. Introduction to Pagemaker	3P
8. Introduction to Corel Draw	3P
9. Introduction to Photoshop	3P
10. Web development: HTML and Scripting language	3P
11. How to search paper in PDF	1P
12. Conversion to PDF to Word and Wise Versa	1P
