Introduction - Most of the people are afraid of honey bees, and why not? These tiny stingers make us cry when they sting but did you know these little four-winged creatures are a blessing of nature and produce the best of sweet things called 'honey'. The World Bee Day is celebrated every year on May 20 to raise awareness about the significance of honey bees.

There was a time when farmers were not allowing any beekeeper to start bee colonies close to their land, but now from last few years, farmers are personally contacting beekeeper to establish a bee colony near their crop. Farmers also provide land to the beekeeper to arrange their bee colony when flowers are about to blossom in the crops. The honey bees have great scope because of its bee products like honey, wax, royal jelly etc. and indirect benefits of crop yield increases by cross pollination.
